

In September 2011 deltaDOT attended the prestigious JAIMA (Japan Analytical Instruments Manufacturers Association - <http://www.jaimasis.jp/2011/english/index.html>) Expo 2011 at Makuhari Messe, Japan in September.

As guest of their Japanese colleagues at KBK (Kyokuto Boeki Kaisha - <http://www.kbk.co.jp/en/index.html>) deltaDOT were delighted with the response and interest in their label free process analytical technology. Apart from meeting with existing colleagues at the Tokyo Institute of Technology CSO Dr. Stuart Hassard met with several major Japanese companies interested in using deltaDOT's HPCE systems in QA/QC of chemicals and process analytics in pharmaceutical manufacture.

Dr Hassard commented "The Japanese biotechnology market is a world class and deltaDOT is very pleased to be working with KBK to establish a bridge to this important market"
